

April 8, 2016

Dear _____,

I do not want assisted suicide as a law. Why? It's a failed experiment in Holland after 10 years. Doctors who promoted it see that it has become **a default mode for dying.**

In Canada in the future it will inevitably change our law, healthcare and society. We can do better for those in pain, we need **palliative care!** For example, A small town community of Leamington outside of Windsor, pooled together and in 4 years built a 6 million dollar satellite hospice in conjunction to Leamington Hospital. You can read about it in the Windsor Star, April 7, 2016 "A Gift of Caring." This is worth the read and a visit! Let's be proactive and life giving in our initiatives. 100% of Canadians deserve it if they need it, not just 30%! Killing is NOT a creative way of addressing our problems! I would like to see the Liberal Gov't show some inspiring, wise, leadership, especially during your 4 years in power. Invest in the noble Canadian people, they deserve it. Thank you for reading my letter. Please respond whether you will support and promote palliative care.

Sincerely,
